for

CVFIBER

COMMUNICATIONS UNION DISTRICT

POLE INVENTORY SERVICES

Date of Issuance: February 1, 2021

Pole Inventory Services IDIQ Contracts

Proposal Submission Deadline: March 1, 2021

CVFiber Pole Inventory Services RFP

CVFiber (“CVFiber”) is issuing this Request for Proposals (“RFP”) to acquire Pole Inventory Services (“Services”) as a prelude to the make-ready, design, construction, and operation of a fiber-to-the-premises (“FTTP”), 100/100 Mbps, broadband network to its twenty-member communities – their residents, businesses, and government agencies. Proposals from any commercial and non-commercial vendors are welcome. Those submitting a Proposal (“Vendor”) shall do so in accordance with this RFP.

I. Introduction

CVFiber is a Communications Union District (CUD), a municipal organization established in 2018. CVFiber is comprised of 20 Central Vermont communities, including, Barre City, Barre Town, Berlin, Cabot, Calais, Duxbury, East Montpelier, Elmore, Middlesex, Marshfield, Montpelier, Moretown, Northfield, Orange, Plainfield, Roxbury, Washington, Williamstown, Woodbury, and Worcester.

The CUD service area exceeds 1,000 road miles and may take four or more years to buildout. CVFiber estimates there are approximately 35,000 poles in the District. Accordingly, it is anticipated the Services work will proceed in phases, with phases possibly being undertaken in parallel, as resources and opportunities permit.

Pole inventory services include, pole data collection, pole attachment license applications, and pole survey with utilities.

The purpose of this RFP is to identify, qualify, and enter into Indefinite Delivery, Indefinite Quantity (IDIQ) Master Service Agreements (MSA) with multiple service providers for the provision of Services to accomplish buildout. Only those Vendors with which CVFiber enters into IDIQ Master Service Agreements will be able to bid and to be awarded Service’s work.

CVFiber desires to enter into IDIQ MSAs with four Service companies to accomplish its objective of delivering fast Internet throughout the District in an as expeditious and cost-effective manner as possible.

II. Scale of the Work

The scale of the work to be accomplished can be seen in Attachment I, a listing of the twenty District towns, their Agency of Transportation road miles, and an estimate of the number of poles per town.

For purposes of the proposal the scope of the work is contained in the Statement of Work, Attachment II.

III. RFP Instructions and Procedures

A. Submissions

Proposals must be received via email at cvfiber-rfp@cvfiber.net.

For consideration for initial work under an IDIQ contract Vendors must respond to this RFP no later than 5:00 PM ET on March 1, 2021.

For consideration for subsequent Services' work Vendor must respond to this RFP. The RFP for IDIQ contractors will remain open until four contractors have entered into IDIQ MSA contracts. CVFiber reserves the right to contract with more than four contractors and to reopen the RFP in its sole discretion.

All Proposals shall become the property of CVFiber.

B. Questions and Inquiries

Any questions or inquiries regarding this RFP must be submitted in writing to cvfiber-rfp@cvfiber.net. The deadline for submitting questions is February 8, seven days after the announcement of this RFP. Responses to all questions and inquiries shall be emailed to all who submitted questions/inquiries and posted on <http://cvfiber.net> within three business days of the deadline for submitting questions. The source of the questions/inquiries will not be identified.

Other than such inquiries, Vendors are prohibited from contacting any person or institution involved in the selection process concerning this RFP.

C. Addenda and Updates

Any addenda and updates to this RFP shall be posted at cvfiber.net. Each Vendor is responsible for checking the website prior to submission of any Proposal to ensure that it has complied with all addenda and updates to this RFP.

D. Cancellation; Rejection

CVFiber reserves the right to cancel this RFP, in whole or in part, at any time. CVFiber may reject any or all Proposals received in response to this RFP in its sole discretion. CVFiber makes no guarantee or commitment to purchase, license or procure any goods or services resulting from this RFP.

E. Multiple Awards

CVFiber reserves the right to contract with one or more Vendors for completion of initial and subsequent Services.

The timing or award of Services contract(s) is subject to funding availability and Board approval.

F. Master Services Agreement and Work Orders

The Master Services Agreement shall be subject to negotiation and execution between CVFiber and the qualified Vendors.

The MSA shall be for a three-year period with an option for up to two, one or two-year extensions.

A Vendor may become disqualified for future work under an MSA for unsatisfactory performance, failure to respond to Requests for Bids as and when requested, or for such other reason as CVFiber may determine in its sole discretion.

The MSA is an Indefinite Delivery/Indefinite Quantity (IDIQ) contract as the resources, timing, size, or number of phases that will be necessary to complete the buildout cannot be determined at this time.

Any MSA that is entered into by CVFiber and Vendor does not imply a guarantee of Work Orders for that Vendor.

When CVFiber has Services that are ready to be performed it will issue a Request for Bids (RFB) to all MSA-contracted Vendors requesting a bid to perform the Services. CVFiber will award a Work Order for the Services to the Vendor(s) who offers the best value as determined by CVFiber in its sole discretion.

G. Costs and Expenses

Each Vendor is responsible for its own costs and expenses involved in the preparation and submission of its Proposal, and any supplemental information requested by CVFiber. CVFiber shall not reimburse any such costs or expenses.

H. State of Vermont Grant Conditions

Notice: CVFiber anticipates there will be State of Vermont funds used to support the work phases. Vendors must follow any applicable Vermont Standard Contracting Conditions (VSCCs) attached to these funds. Any state conditions associated with funding that CVFiber receives will become part of the MSA contract terms and conditions.

I. Notification

CVFiber will notify Vendors of their selection for negotiation for consideration to become an IDIQ contractor under the provisions of an MSA. CVFiber will attempt to make its selection(s) within fourteen days of receipt of final proposals, but shall have full discretion to make its decision earlier or later.

J. Public Information

CVFiber is a municipal organization that must conduct its business subject to existing laws and regulations. Accordingly, the following principles will apply to the Proposal, negotiations, MSA and Work Order(s):

The names of all Vendors submitting Proposals may be announced publicly, but the Proposals and individual negotiations with Vendors will not be made public.

Any Master Service Agreement and Work Order negotiated with a Vendor, excluding business confidential material as agreed to by the Parties, will be made public after execution.

K. Intellectual Property Rights

All work performed shall be “work for hire” and shall be owned exclusively by CVFiber, and the Vendor shall not obtain or retain any rights or licenses from any work produced under the MSA or Work Order, unless otherwise agreed to by the parties in writing.

This includes all data obtained in fulfillment of service performance. Nor shall the Vendor provide the data to a third party in any form (digital, hard copy, etc.) or format except as permitted by CVFiber in writing.

IV. Selection Criteria

This RFP is designed to enable CVFiber to determine which Vendor(s) will best satisfy the organization’s requirements and ability to enter into a satisfactory agreement. CVFiber reserves the right to select the best value for the performance of the Services, which may not be the lowest price bidder.

Each Vendor will be evaluated against the same set of criteria, which shall include:

1. Experience, key personnel, and references
2. Methodology, completeness and quality of response.
3. Proposed data, data format, and exclusions.
4. Price and basis for price.
5. Schedule.
6. Acceptance of terms and conditions.

V. Proposal Format

A. Proposal Submissions

Proposals shall be submitted using the following format:

1. Table of Contents
2. Executive Summary
3. Company name, address, point of contact with email and phone number
4. Experience, Qualifications and Accomplishments
5. Key Personnel
6. References with email and phone number
7. Price, with breakdown and assumptions, for Services

Vendor shall show the basis on which prices were determined for the Services, e.g., cost per pole, cost per mile, etc. for the following:

- a. Pole Data Collection
- b. Pole Attachment License Applications
- c. Pole Survey with Utilities.

8. Describe the methodology Vendor will use to perform the Services

9. Schedule

Vendor shall outline the steps and timing required to complete the three components of the Services.

- a. Pole Data Collection target start date: March 22, 2021
- b. Pole Attachment License Applications
- c. Pole Survey with Utilities.

10. Proposed Subcontractor Information (if any)

11. Assumptions and Exclusions

12. Intellectual Property Rights Claimed, if any

13. Miscellaneous Information

14. Relationships and Conflicts of Interest

Describe any relationship between the company and subcontractor, or any parent, subsidiary or related company, or any director or officer of any of them, with CVFiber, or members of its Board. Coincident with the execution of an MSA, Vendor shall be required to execute a Conflict of Interest form stating that the Vendor is unaware of any conflict it, and any of its approved subcontractors, may have.

15. Resumes of Key Personnel

VI. Required Contract Provisions

The following provisions will be required by the state of Vermont and shall be included in the MSA awarded to the selected contractor(s), if CVFiber receives State funds in support of Pole Inventory Services. [Note: "Party" includes "Vendor".]

1. False Claims Act: The Party acknowledges that it is subject to the Vermont False Claims Act as set forth in 32 V.S.A. § 630 et seq. If the Party violates the Vermont False Claims Act it shall be liable to the State for civil penalties, treble damages and the costs of the investigation and prosecution of such violation, including attorney's fees, except as the same may be reduced by a court of competent jurisdiction. The Party's liability to the State under the False Claims Act shall not be limited notwithstanding any agreement of the State to otherwise limit Party's liability.

2. Whistleblower Protections: The Party shall not discriminate or retaliate against one of its employees or agents for disclosing information concerning a violation of law, fraud, waste, abuse of authority or acts threatening health or safety, including but not limited to allegations concerning the False Claims Act. Further, the Party shall not require such employees or agents to forego monetary awards as a result of such disclosures, nor should they be required to report misconduct to the Party or its agents prior to reporting to any governmental entity and/or the public.

3. Location of State Data: No State data received, obtained, or generated by the Party in connection with performance under this Agreement shall be processed, transmitted, stored, or transferred by any means outside the continental United States, except with the express written permission of the State.

4. Fair Employment Practices and Americans with Disabilities Act: Party agrees to comply with the requirement of 21 V.S.A. Chapter 5, Subchapter 6, relating to fair employment practices, to the full extent applicable. Party shall also ensure, to the full extent required by the Americans with Disabilities Act of 1990, as amended, that qualified individuals with disabilities receive equitable access to the services, programs, and activities provided by the Party under this Agreement.

5. Taxes Due to the State:

A. Party understands and acknowledges responsibility, if applicable, for compliance with State tax laws, including income tax withholding for employees performing services within the State,

payment of use tax on property used within the State, corporate and/or personal income tax on income earned within the State.

B. Party certifies under the pains and penalties of perjury that, as of the date this Agreement is signed, the Party is in good standing with respect to, or in full compliance with, a plan to pay any and all taxes due the State of Vermont.

C. Party understands that final payment under this Agreement may be withheld if the Commissioner of Taxes determines that the Party is not in good standing with respect to or in full compliance with a plan to pay any and all taxes due to the State of Vermont.

D. Party also understands the State may set off taxes (and related penalties, interest and fees) due to the State of Vermont, but only if the Party has failed to make an appeal within the time allowed by law, or an appeal has been taken and finally determined and the Party has no further legal recourse to contest the amounts due.

6. Child Support: (Only applicable if the Party is a natural person, not a corporation or partnership.) Party states that, as of the date this Agreement is signed, he/she:

A. is not under any obligation to pay child support; or

B. is under such an obligation and is in good standing with respect to that obligation; or

C. has agreed to a payment plan with the Vermont Office of Child Support Services and is in full compliance with that plan.

Party makes this statement with regard to support owed to any and all children residing in Vermont. In addition, if the Party is a resident of Vermont, Party makes this statement with regard to support owed to any and all children residing in any other state or territory of the United States.

7. No Gifts or Gratuities: Party shall not give title or possession of anything of substantial value (including property, currency, travel and/or education programs) to any officer or employee of the State during the term of this Agreement.

8. Certification Regarding Debarment: Party certifies under pains and penalties of perjury that, as of the date that this Agreement is signed, neither Party nor Party's principals (officers, directors, owners, or partners) are presently debarred, suspended, proposed for debarment, declared ineligible or excluded from participation in Federal programs, or programs supported in whole or in part by Federal funds.

Party further certifies under pains and penalties of perjury that, as of the date that this Agreement is signed, Party is not presently debarred, suspended, nor named on the State's debarment list at: <http://bgs.vermont.gov/purchasing/debarment>

9. State Facilities: If the State makes space available to the Party in any State facility during the term of this Agreement for purposes of the Party's performance under this Agreement, the Party shall only use the space in accordance with all policies and procedures governing access to and use of State facilities which shall be made available upon request. State facilities will be made available to Party on an "AS IS, WHERE IS" basis, with no warranties whatsoever.

10. Requirements Pertaining Only to State-Funded Grants:

A. Certification Regarding Use of State Funds: If Party is an employer and this Agreement is a State-funded grant in excess of \$1,001, Party certifies that none of these State funds will be used to interfere with or restrain the exercise of Party's employee's rights with respect to unionization.

(End of Standard Provisions)

ATTACHMENT I

SCALE OF WORK

It is anticipated that the aggregation of the work in phases and specific routes will be based on funding, priorities, impact of federal contracts, and other factors.

The following table reflects the scale of the work to be accomplished.

CVFIBER SERVICE AREA				
	Town	AOT Mileage Class 1,2,3 and St Hwy	Estimated Poles @ 27 Poles/Mile	Estimated Poles @ 1 Pole/185'
1	BARRE CITY	48.9	1,322	1,397
2	BARRE TOWN	106.9	2,887	3,051
3	BERLIN	76.5	2,066	2,183
4	CABOT	64.5	1,741	1,840
5	CALAIS	80.0	2,159	2,282
6	DUXBURY	35.0	946	1,000
7	EAST MONTPELIER	74.3	2,007	2,121
8	ELMORE	33.2	895	946
9	MARSHFIELD	58.2	1,571	1,661
10	MIDDLESEX	64.9	1,752	1,852
11	MONTPELIER CITY	56.0	1,513	1,600
12	MORETOWN	48.7	1,316	1,391
13	NORTHFIELD	85.5	2,307	2,439
14	ORANGE	43.1	1,165	1,231
15	PLAINFIELD	41.7	1,126	1,190
16	ROXBURY	43.2	1,166	1,232
17	WASHINGTON	58.0	1,566	1,656
18	WILLIAMSTOWN	88.1	2,378	2,513
19	WOODBURY	44.6	1,203	1,272
20	WORCESTER	28.7	774	818
	TOTALS	1,180	31,859	33,676

ATTACHMENT II
POLE INVENTORY SERVICES
STATEMENT OF WORK

Phase 1

It is anticipated that the Initial Services' Work (Phase 1) will be one hundred and twenty (120) miles. The actual specific route will be identified as part of the first RFB and Work Order.

Your proposal submission to this RFP will **not** be used as your proposal for Phase 1.

Your proposal submission will assume:

- a. Service route of 120 miles, and
- b. 65% (78 miles) will be on roadway.

Pole Inventory Services

The Services consist of the following elements:

1. Pole Data Collection
2. Pole Attachment License Applications
3. Pole Survey with Utilities.

Bidder should supply all costs by task. All data collected will be the property of CVFiber.

Note: At the time of Work Order award CVFiber will designate the database system(s) into which all data shall be entered/uploaded.

1. Pole Data Collection

Selected Vendor must conduct a pole inventory for the defined Phase 1 service route. This includes GMP/WEC Pole digital data and collection of CCI pole information where these poles may offer better or more efficient fiber runs to connect to all premises along a route. CVFiber has a GIS database of proposed locations and poles for the District.

All inventory work shall:

1. Be conducted according to the VT Utility Pole Data Standard v.1 (Attachment III),
2. Be accomplished with a GPS data collection device with sub-meter accuracy, such as IKE, Drone, LIDar or similar system, and

3. Include the attributes as described in the VT Utility Pole Data Standard v.1 in the pole inventory database.
4. The following attributes shall be collected in addition to the attributes in the VT Utility Pole Data Standards.
 - a. MRWKEST Make Ready work estimate (None, Light, Medium, Heavy)
 - b. ONOFFROAD On/Off Roadway (On or Off)
 - c. RISERSDEST - Risers Destination (premise, pole)
 - d. ATXING - At Crossing (Road, Freeway, Rail, Bridge. Default: No)
 - e. Pole images (images of tags, pole condition, special circumstances)
 1. PHOTOTAG1 ... PHOTOTAGn
 2. PHOTOPOLE1 ... PHOTOPOLEn
 3. PHOTOSPECIAL1 ... PHOTOSPECIALn

Phase 1 Deliverable: A database of poles needed to bring FTTP for the Phase 1 service route. This information should be formatted to support completion of applications to the utility for proposed fiber attachments.

2. Pole Attachment License Applications

The Vendor will be responsible for completing and submitting applications on behalf of CVFiber to pole owners (WEC, GMP, CCI, etc.) using the information from the inventory in a form and format approved by CVFiber in writing before submission.

The dataset will be updated with Pole Application File Dates;
 POLEAPPFILED1 ... POLEAPPFILEDn – dates applications filed (mmddyyyy)

3. Pole Survey with Utilities

The Vendor will be responsible for the joint pole survey ("rideout") with the utility company. This happens within 60 days of the Pole Application. During this process, the Vendor working with the utility will determine how many poles need to be replaced and determine which facilities on the poles need to be moved to make room for the new attachment. This information must be entered into the pole database. The selected Vendor shall notify CVFiber of all the necessary make-ready work and identify the costs and timeframe that the utilities require. The selected Vendor will support CVFiber in negotiations with the utility.

The dataset will be updated with Pole Rideout Dates;

POLERIDESCHED – date schedule of first rideout (mmddyyyy)
POLERIDECOMP – date rideouts completed (mmddyyyy)

Version History

Date	Notes
December 9, 2020	Version 1.0 – Approved by Enterprise GIS Consortium

Process

Statutory Authority and Data Standard Adoption

The Vermont Center for Geographic Information (VCGI) has the [statutory authority](#) to craft and adopt Vermont GIS standards and guidelines. The State’s Enterprise GIS Consortium (EGC) has been established as the organization responsible for reviewing and approving Vermont GIS standards crafted by VCGI (in collaboration with the Vermont GIS Community). The standard will be adopted according to the EGC [Procedure](#).

Development and Review of the Standard

The initial draft of the Standard was developed by the Vermont Department of Public Service, based on the Green Mountain Power dataset and input from Vermont Communications Union Districts (CUD)ss on additional fields that should be incorporated. VCGI provided technical assistance. A draft of the document was provided to Vermont utility pole owners before the document was submitted to the EGC for adoption.

Version 0.1.d6 was circulated for public comments on October 15,2020. Version 1.0 was issued December 4, 2020, including changes recommended by comments.

Purpose

The purpose of the Standard is to foster a uniform system for pole information. It is designed for all utilities and telecom organizations to effectively plan and manage their infrastructure over time. The Standard identifies the type and form of information about utility poles that are most useful. This can be used to guide decisions about what information to collect and maintain on these assets.

Applicability

This Standard is for use by all of Vermont’s pole-owning utilities and telecom organizations and their consultants or contractors.

Maintenance

The Vermont Department of Public Service is the steward for the Standard. Individual pole owners are responsible for the datasets related to poles they own.

Adoption

Nothing in this Standard requires its adoption, either in whole or in part, by any entity, including pole owners or other users.

Specification

Data Format

Data should be stored and shared in file geodatabase (fgdbs) or GeoPackage (gpkg) format.

VT Utility Pole Data Standard

Spatial Reference

When data is shared, Vermont State Plane Coordinate System (NAD1983, meters) is the preferred spatial reference. All datasets must set spatial-reference properties (e.g., shapefiles have .prj files). If vertical measurements are included, employ Vertical Coordinate System NAD_1983, include GEOID and Vertical Datum in the projection, and where MSL is employed, use LLT, HT, and LT.

Precision

The precision of the location measurements should be presented in the optional COLLECTDEV and DEVPREC fields if this information is available. The table below relates the precision and associated appropriate decimal places for decimal degree coordinates for different collection devices. If these fields are not populated, the precision should be assumed to be the least precise level in this table.

Collection device	Precision	Decimal places
Survey-grade specialized GPS	<1m	x.xxxxxx (6 places)
GIS-grade commercial GPS	1m	x.xxxxx (5 places)
Smartphone	10m	x.xxxx (4 places)

Geometry Type

Point Shapefile.

Dataset Naming

Naming convention to be used when exchanging data: Utility_<Utility Name>_Poles_point
For example: Utility_GMP_Poles_point.shp

Metadata

Information about the layer should be included in an accompanying readme.txt file (or in the Shapefile Description), on accord with the VT GIS Metadata Standard, including these items:

- Title:
- Abstract: (link/refer to standard here) ...anecdotes, other helpful info...
- Data-Revision Date:
- Point of Contact:
- Topic: utilitiesCommunication
- Metadata Date:
- Level of adoption: if adopted in part, describe how it deviates from the standard

Attachments

The presence of hardware or line attachments on a pole should be indicated by Y/N in the appropriate fields. If specific information about attachments is compiled, it should be stored in a separate Attachments dataset. This data should be stored separately as it may contain confidential information. This table should use an appropriate key so that it can be joined to the feature class. The table should employ the naming convention: TABLE_<Utility Name>_Poles_Attachments. The table should be saved as a separate table in the geodatabase or GeoPackage. Pole owners should refrain from publishing the ATTACHTP field until January 2022.

VT Utility Pole Data Standard

Key

The TAG field should relate a unique identification number for each pole, as such there should be no duplicates for this field so it can be employed as a key for joining other tables. Where the tag number is not available, the entry should be NT followed by two digits.

Fields

Field	Data Type	Description
Latitude	Double	Coordinate
Longitude	Double	Coordinate
OBJECTID	Object ID	Sequential
CREATIONUR	String	The user or designer who created the facility
DATECREATE	Date	The date that the facility was created
DATEMOD	Date	The date that the facility was last modified
LASTUSER	String	The last user or designer to modify the facility
POLETAG	Text	Unique code assigned by pole owner
LOCATIONID	Text	Unique code assigned by pole owner
OWNER	Text	Pole owner Acronym
POLEHEIGHT	Long Integer	Height above ground level in decimal feet
CLASS	Text	Pole class
POLEMAT	Text	Pole Material
INSTALLDAT	Date	Installation date mm/dd/yyyy
COLLECTDEV	Short Integer	1,2,3
DEVPREC	Short Integer	1,2,3
POLEUSE	Text	Pole Use
MAINTENANC	Text	Utility responsible for service
TELROUTE	Text	Unique code assigned by pole owner
TELPOLE	Text	Unique code assigned by pole owner
JCTPOLE	Text	Y/N (Is Pole a Junction) (Default N)
SHAPE	Geometry	Table Mandatory
TRANSFRMR	text	Y/N
TRANSEXESS	Text	Y/N (Is there extra loop cable hanging)
GUYS	text	Pole to pole, Down, or N
ANCHORNEED	text	Y/N
HDWRATTACH	text	Y/N (cable amplifier, DSLAM, etc.)
RISERS	text	Y/N
CUSTDROPS	short integer	Quantity
TPTATTACH	text	Y/N (Third-party, other than ILEC)

Attachments Table

POLEKEY	Text	Field to match in feature class (POLETAG)	
ATTACHID	Text	Unique Identifier	
ATTACHDT	Date	Date of Attachment	
ATTACHTP	Text	Telephone, Cable, Fiber, Other,	
HASBOND	Text	Y/N	
ATTACHHT	Double	Height of Attachment, Above ground level, in decimal feet	
DISTTOELEC	Double	Distance, in decimal feet, from the top attachment to the bottom of the electric safety space	
Photograph*			

*Saved separately in file geodatabase
