Audit Update

Discussion Summary: Chris noted that we started the audit process in June and the auditors have already done some payroll testing, payables testing, inventory testing, revenue testing and grant revenue testing. It seems to be going well. We will be discussing a change of the SEFA with them (schedule of federal expenditures) to get their understanding of our interpretation of our fixed cost sub-awards. It is hoped that the audit will last just a few more weeks.

Review of May 2025 Financials

Discussion Summary: Chris first went over the balance sheet as of the end of May 2025. He noted a CD of \$1.4million that is the money we received from CCI after taking over their RDOF areas. This is a line of credit that the FCC requires us to have in order to engage in RDOF high class funding. However, we don't intend to draw on this line of credit to build to those RDOF areas. We will be earning 6% on that money while it sits there. Then he briefly went over the income statement, that showed a year-to-date loss of \$291,000 in income.

Customer Revenues for May 2025:

Discussion Summary: Recurring customer monthly revenue was \$139,533 for May (combined NEK Broadband & CVFiber) from 1,385 customers. There was a little bump in revenue that Chris attributed to catching up on the installs of folks who needed rodding of their conduit that couldn't be done over the winter.

A Business Opportunity
